

Johnson & Johnson Issues Statement on August 2 Defense Verdict in Kentucky

August 2, 2019

New Brunswick, NJ – We are pleased the jury rejected the claim that Johnson’s Baby Powder contained asbestos and caused the plaintiff’s disease, which was decided in approximately 30 minutes following a two-week trial. This is the sixth jury in recent months that has found in favor of Johnson & Johnson, and all verdicts finding against the Company that have been through the appeals process have been overturned. Today’s decision, and this trial track record, is consistent with the decades of clinical evidence and scientific studies by medical experts around the world that support the safety of Johnson’s Baby Powder.
