

Johnson & Johnson Issues Statement on October 9 Defense Verdict in California

October 9, 2019

New Brunswick, NJ - We sympathize with anyone suffering from cancer, and we understand patients and their families are seeking answers. The jury got it right — Johnson's Baby Powder does not contain asbestos and was not the cause of the plaintiff's disease. This is the seventh jury that has found in favor of Johnson & Johnson, and importantly, all of the verdicts against the Company that have been through the appeals process have been overturned. Today's decision, and this trial track record, are consistent with the decades of clinical evidence and scientific studies by medical experts around the world that support the safety of Johnson's Baby Powder.
