

Johnson & Johnson Statement on Johnson Verdict

October 2, 2025 - Attributable to Erik Haas, Worldwide Vice President of Litigation, Johnson & Johnson:

“Once again, another jury has rejected the plaintiff’s lawyers’ baseless claims predicated on junk science.

“Like the vast majority of cases tried to date, and consistent with decades of scientific research, another jury found that Johnson’s Baby Powder is safe, does not contain asbestos and does not cause cancer.

“It is a grave injustice that plaintiffs’ lawyers continue to mislead people into thinking talc is dangerous and the cause of their disease when there is no credible evidence that it contains asbestos or causes cancer. Instead, these plaintiffs have fallen victim to the business model of the plaintiffs’ lawyers, who roll the dice in search of jackpot verdicts, fueled by litigation-funded junk science, without regard to the fact that most claimants recover nothing in the tort system.”
